

Pre-requisites:

moviestabledata should be available in **Athena**.

Steps:

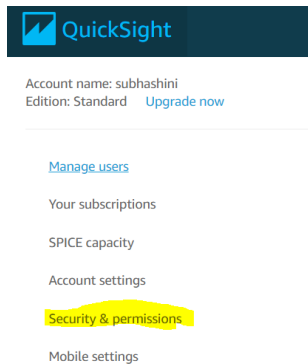

1. Go to QuickSight. It will ask you for your email address associated with your AWS Account. Feed in your email id and you will land up in QuickSight.
2. Click on your icon at top right corner and then

3. Click on Manage QuickSight. You need to have admin rights.

4. Click on Security and Permissions.

5. We now need to provide permissions to QuickSight so that it can access Athena. In order to access Athena, QuickSight should also have permissions to access underlying S3 bucket which Athena is using.
6. Click on Add or Remove.

- Uncheck Athena and check it again. It will now ask you to choose S3 bucket. Select your S3 bucket. In our case it will be **moviestabledata**. Click on Finish.

Select Amazon S3 buckets ×

S3 Buckets Linked To QuickSight Account

S3 Buckets You Can Access Across AWS

Select the buckets that you want QuickSight to be able to access.
Selected buckets have read only permissions by default. However, you must give write permissions for Athena Workgroup feature.

☐ Select all

S3 Bucket	Write permission for Athena Workgroup
<input type="checkbox"/> aws-glue-temporary-846453536904-us-east-1	<input type="checkbox"/>
<input type="checkbox"/> demoemrbucket	<input type="checkbox"/>
<input type="checkbox"/> elasticbeanstalk-ap-south-1-846453536904	<input type="checkbox"/>
<input type="checkbox"/> elasticbeanstalk-us-west-1-846453536904	<input type="checkbox"/>
<input type="checkbox"/> goairticket	<input type="checkbox"/>
<input type="checkbox"/> jdairticket	<input type="checkbox"/>
<input checked="" type="checkbox"/> vinayinputdataforglue	<input type="checkbox"/>

Cancel

Finish

- Click on update.

Enables you to invite IAM users from this AWS Account to access QuickSight

—

	Amazon S3 Enables QuickSight to auto-discover your Amazon S3 buckets Details	<input checked="" type="checkbox"/>
	Amazon Athena Enables QuickSight access to Amazon Athena databases	<input checked="" type="checkbox"/>
	Amazon S3 Storage Analytics Enables QuickSight to visualize your S3 Storage Analytics data	<input type="checkbox"/>
	AWS IoT Analytics Enables QuickSight to visualize your IoT Analytics data	<input type="checkbox"/>
	Amazon Elasticsearch Enable QuickSight access to your Amazon Elasticsearch domains	<input type="checkbox"/>
	Amazon SageMaker Enables QuickSight to infer fields from custom ML models	<input type="checkbox"/>
	Amazon Timestream Enable QuickSight access to your Amazon Timestream databases	<input type="checkbox"/>

Cancel

Update

- Click on QuickSight to go to home page.

QuickSight access to AWS services

QuickSight can connect to the selected AWS products & services

Amazon Redshift
Enables QuickSight to auto-discover clusters

Amazon RDS
Enables QuickSight to auto-discover instances

- Click on **New Analysis button** on the right-side top corner.
- Click on **New Dataset button** on the left-side top corner.
- Select **Athena**.

13. Enter Data Source Name **movies-database-karthik**. Click on Validate Connection and then Click on Create Dataset.

New Athena data source
